## How to bet the 1<sup>st</sup> and 2<sup>nd</sup> fav, using the Fibonacci staking plan.

OK, the selection process is extremely easy, and the staking is also easy once you have used it a few times.

Everything I am about to show you can be done on auto pilot or manually with our [Fibo Bet Bot](#).

1. The selection process: We are only interested in races where the favourite is 3.00 odds or better. We use betfair however you can use whatever betting out you chose, if you can bet the odd amounts.
2. When we come to a race the is suitable, we are going to bet the same amount on the 1<sup>st</sup> fav and 2<sup>nd</sup> fav.
3. Staking is to the Fibonacci sequence, and we use up to 144 as the last stake.
4. The sequence is: 1,1,2,3,5,8,13,21,34,55,89,144.
5. On staking as we are betting two horses, we bet the sequence twice. Example if we are betting .10 cents/pence and we are at Bet 4 that equals Sequence 3\*.10 = .30 stake is placed on each horse, in our case two horses, .60c/p for the race.

Below is the Ready reckoner for the bets and staking.

Chart.

**Fibonacci Staking Sequence Chart with Base Bet**

		Base Stake	Base Stake	Base Stake	Base Stake	Base Stake
Bet Series	Sequence	0.05	0.10	0.20	0.50	1.00
1	1	0.05	0.10	0.20	0.50	1.00
2	1	0.05	0.10	0.20	0.50	1.00
3	2	0.10	0.20	0.40	1.00	2.00
4	3	0.15	0.30	0.60	1.50	3.00
5	5	0.25	0.50	1.00	2.50	5.00
6	8	0.40	0.80	1.60	4.00	8.00
7	13	0.65	1.30	2.60	6.50	13.00
8	21	1.05	2.10	4.20	10.50	21.00
9	34	1.70	3.40	6.80	17.00	34.00
10	55	2.75	5.50	11.00	27.50	55.00
11	89	4.45	8.90	17.80	44.50	89.00
12	144	7.20	14.40	28.80	72.00	144.00

Ok, how do we use the staking and what happens when we get a winner.

The Start:

We start staking at bet one, which is sequence one, and how much is that bet going to be?

It depends on the Base Stake you are going to use. For example, we will use .10cents/pennies. (we can use these low stakes with the Fibo Bet Bot.)

So, bet 1 will be  $.10 * 1 = \text{Stake } .10$  per horse for the first race, so if we have 2 horses we will bet .10cents each, so total spend .20 cents.

**We have a losing race.**

Move to bet two, base stake as the name implies says the same for the series, it is multiplied by the sequence.

Bet 2, Seq 1 \* Base stake = .10 (yes same as first bet) = .10 per horse.

**Loss again.**

Bet 3: Seq 2 , Base stake= .20 per horse.

**Loss again.**

Bet 4: Seq 3, Base stake =.30 per horse.

**Loss again.**

Bet 5: Seq 5, Base stake =.50 per horse.

**Loss again.**

Bet 6: Seq 8, Base stake=.80 per horse.

So, by now you see how we stake when we get a loss.

### **What happens when we get a win?**

You are the boss, you decide, now of course, that would depend on whether you are winning or not?

In the above on Base Stake .10 cents, we outlay 4.00. Our winner was odds at 3.50. So, (we will ignore commission to kept it simple) Stake was .80, so return was 2.80, less the series staking of 4.00 = **series loss of 1.20**

**We have bet six races and betting the top two horses in the betting, so you would think that these two horses on average win about 50% of races. We have just experienced a 16% strike rate.**

So, remember you are the boss, you can do two main things, one is to continue sequence as you are still losing in the series, (this is what the bot will do if the series is in negative.) Or you can drop back two sequences to Bet 4, sequence three.

Let us assume you do as the bot would and that is continue.

Bet 7, Seq 13, Base stake =1.30

The 2<sup>nd</sup> fav wins at 4.90, (yippee)  $4.90 \times 1.30 = 6.37$  return, less  $1.30 \times 2 = 2.60$  (total stake for the race.) Race profit 3.77 less 1.20 (series loss) = \$2.57 series profit.

Total series spend, 6.60. Profit 2.57 = 39% return on investment.

### **What do you do now?**

You can either, clear or start again, drop back two sequences to bet 5, sequence 5, stake .50cents.

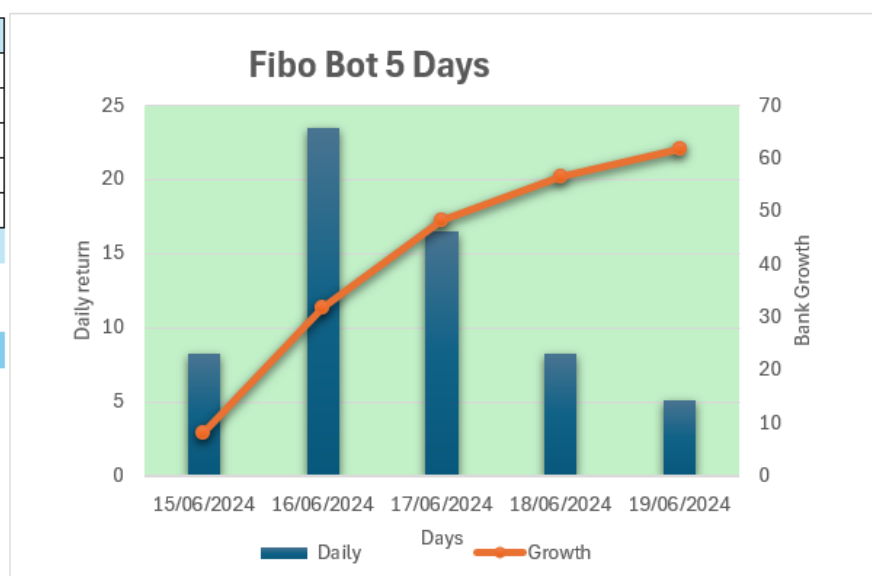

That is the 1<sup>st</sup> and 2<sup>nd</sup> fav strategy, we have been running it on auto for Australia, NZ, SA, UK, and Ireland for the past 5 days since we finished the bot.

### **Here are the results:**

Date	Daily	Growth
15/06/2024	8.23	8.23
16/06/2024	23.51	31.74
17/06/2024	16.54	48.28
18/06/2024	8.3	56.58
19/06/2024	5.16	61.74
<b>Grand Total</b>	<b>61.74</b>	

**Start Stake each day .05c**

Auto Pilot

And you can see we started each day at .05 cents/pence.

You can get all I have shown you above and much more with the Fibo Bet Bot.

Five auto mini bots and a manual mini bot, so you can start staking at small stakes.
